MAY 19, 2023

Hello,

I am excited to work with you! I am currently a Master of Computer Science postgraduate student with concentration in Internet Computing at PACE University. I come from a strong background in information technology and computer science and have a passion for teaching. My areas of focus and interesting varies from web development to cybersecurity. I graduated Sum Cum Laude from Southern New Hampshire University with a bachelor's degree in information technology from a program that was well-balanced and helped to build my technology and leadership skills. I am confident that with my academic background, my ability to help support student learning and experience that I have the credentials need to thrive in an instructor position for any computer science and technology related courses.

I am currently employed as the website and social media specialist at Wythe-Grayson Reginal Library. I also serve as the technology manager and dance instructor at Bluefield Dance Theatre. These roles have provided me with a solid foundation in problem-solving skills and working with diverse age groups. During the challenging times of the COVID-19 pandemic, my technological expertise played a crucial role in enabling my dance studio to thrive by quickly transitioning to online classes while other studios had to close. Additionally at Wythe-Grayson Regional Library, I have been instrumental in designing strategies to enhance their web presence and elevate their social media marking efforts. These experiences have honed my skills in navigating the ever-changing landscape of multidisciplinary technology, making me well -equipped to excel in today's dynamic and technology-driven world.

To date my experience as an IT professional has been extremely rewarding and productive. It was part of my decision to gain my master's degree so that I may share my experience and teach at the colligate level. As a current instructor at Bluefield Dance Theatre, I prioritize creating a supportive and engaging learning environment for my students. I am committed to providing clear and comprehensive instruction, offering individualized support as needed, and maintaining open lines of communication with students and parents.

Thank you for consideration. I can be reached via email at sd10232n@pace.edu or by phone at (276)-724-0054. I enthusiastically look forward to hearing from you soon.

Sincerely,

Sabrina Davidson
